BUILT BY A 13-YEAR TRANSPORTATION OPERATOR

One founder. Three products.

Built solo. By design. By a 13-year transportation operator.

- Oliver Cummins · sole founder · architected and shipped all three products from \$0
- JadeOS Quantum AI flagship · the AI command center for builders, founders, lifelong learners
- JadeOS-Agent Suite · the freight-vertical agent productization of JadeOS Quantum AI for logistics
- Hot Shot TMS · the system of record built for the underserved hot-shot segment

Two pains. One operator who lived both.

- Consumer/prosumer pain · 8-14 fragmented SaaS subs at \$187/mo average · no shared memory
- Freight pain · empty miles 15-22% · dispatch decisions tribal · turnover ~78% mid-market
- Cross-cutting pain · existing TMS vendors over-serve enterprise · under-serve hot-shot carriers
- All three problems compound · one founder lived them · now ships the antidote
